

is pleased to announce a new product...

V1 Home allows any coach or athlete to record and analyze a curling delivery using a fire-wire enabled notebook computer along with a mini-dv camera. No need to tape the delivery and show it on a TV inside. V1 Home records the video on the computer's hard drive which allows instant feedback to the athlete. The motion can be analyzed in real time, slow motion or frame by frame. There are drawing tools available to show correct angles on top of the video. There is also video overlay and side by side comparison to show the athlete their progress.

Can't seem to analyze a problem? Don't worry, the software allows you to send the video to one of Curl Ontario's technical experts to help with the analysis. All you need is an internet connection!

**All of this for \$50_(plus tax)! Compare this to similar packages costing thousands of dollars.
Best of all, it's available from Curl Ontario.**

Join the evolution of sport motion analysis... get V1 Home today!
